Firewall Phases

Phase One How You Got Noticed	A few years ago he was hacking into Planetary Consortium computer servers (like you do) and happened upon highly classified folder. He cracked one cypher after another until he found himself reading through the report of a Project Ozma mission to capture and study exsurgents from the White Zone. While he was trying to figure out what to do with this data he was contacted by some other hacktivists who said they knew what he had his hands on and Ozma did too. He basically had the choice of going into Firewall's witness protection program or trying to survive with a bullseye on his back. Not a great choice.
----------------------------------	---

Phase One Aspect	Be Careful What You Dig For
------------------	-----------------------------

Phase Two A Recent Mission	They got there and found the remains of three separate hypercorp base camps, but none of the staff inhabiting them. After a little searching and some close calls with visual basilisk hacks in the moon's circuitry, the team found the majority of the hypercorp personnel and the bodies of the others. While the gun-toters took out the drones, Piotr and the other surviving hacker reprogrammed some of the hypercorps' nanite swarms into dissemblers that quickly reduced the antennae array to component materials. They triggered some sort of alarm and lost a few more Firewall agents but they made it out to report back in and that's what really matters.
-------------------------------	--

Phase Two Aspect	Nothing Good Comes Cheap
------------------	--------------------------

Phase Three Crossing Paths	Piotr served as her Outer System guide and identity-forger for Psyra when she was relocated by Firewall off of Luna.
-------------------------------	--

Phase Three Aspect	Outer System Welcome Committee
--------------------	--------------------------------

Durability Table

For biomorphs and pods, use the lowest Durability or Somatics skill.
 For synthmorphs and infomorphs, use Durability.

DURABILITY/SOMATICS	PHYSICAL STRESS BOXES
Mediocre (+0)	2
Average (+1) or Fair (+2)	3
Good (+3) or Great (+4)	4
Superb (+5)	4 with an additional mild morph consequence

Muse

One Skill at Fair (+2)
 One Skill at Average (+1)
 Two Stress Boxes
 No Consequences
Two Typical Skills are Investigate and Infosec

Phase Four Crossing Paths Again	After Professor Solomon returned from Legba with all of those stolen egos, Piotr relocated them in bodies in Anarchist hubs.
------------------------------------	--

Phase Four Aspect	Room For All Out Here
-------------------	-----------------------
